

Problem Statement - Develop a dynamic webpage where content updates on button click using JavaScript DOM. Implement jQuery effects: hide/show elements, toggle visibility, and animate elements.

Code:-

```
1  <!DOCTYPE html>
2  <html>
3  <head>
4    <title>Interactive DOM & jQuery Page</title>
5    <meta name="viewport" content="width=device-width, initial-scale=1.0">

7    <script src="https://code.jquery.com/jquery-3.6.0.min.js"></script>

9    <style>
10     body {
11       margin: 0;
12       font-family: Arial, sans-serif;
13       background: #f4f6f9;
14     }
15
16     header {
17       background: #2c7a7b;
18       color: white;
19       padding: 20px;
20       text-align: center;
21     }
22
23     .container {
24       width: 90%;
25       margin: 30px auto;
26     }
27
28     .section {
29       margin-bottom: 40px;
30     }
31
32     .cards {
33       display: flex;
34       gap: 20px;
35       flex-wrap: wrap;
36     }
37
38     .card {
39       flex: 1;
40       min-width: 260px;
41       background: white;
42       padding: 20px;
43       border-radius: 10px;
44       box-shadow: 0 4px 10px rgba(0,0,0,0.1);
45       text-align: center;
